

## **REACH & POPs Statement**

Easby Group has verified the UK REACH, EU REACH (EC No. 1907/2006), & EU POPs (EU2019/1021) regulations to the best of its knowledge, and we believe none of the articles we sell intentionally contain any of the Substances of Very High Concern (SVHC's) currently on the candidate list in concentrations of >0.1% by weight, or any of the covered chemicals in EU POPs in any quantity.

All statements of conformity are made to the best of our knowledge with the information at our disposal at the time the declaration is made. Our declarations are only as accurate as the data received from our suppliers and as we are not the original manufacturer of the components, we do not perform physical testing on any of the products we distribute to validate the accuracy of the data received. As such we cannot accept liability for factors outside of our control.

### **EU & UK REACH**

The latest list of SVHC (known as the candidate list) can be found on the HSE website for UK REACH and the European Chemicals Agency website for EU REACH;

<https://www.hse.gov.uk/reach/svhc-overview.htm>

<https://echa.europa.eu/candidate-list-table>

We do not produce or import to the EU any substance in volumes that exceed one tonne per substance, and so are not required to register under EU REACH.

In accordance with article 33 of UK REACH & article 33 of EU REACH we provide information to our customers on products knowingly containing Substances of Very High Concern (SVHC) over a limit of 0.1% by weight.

### **EU POPs (EU 2019/1021)**

The EU POPs Regulation aims to eliminate the use of chemicals which are persistent in nature and pose adverse risk to human health and the environment. The regulation transposes the Stockholm Convention and Aarhus protocol into EU law and restricts/prohibits production, placing on the market and use of POPs, as well as other mitigation measures.
